PERSONAL INFO

Hello everyone,

Hi, I'm a Visionary, chief, project designer. My passion, for new technologies and innovative solar technologie ventured me into design field where I challenge to the fullest in every projekt.

Live in Pabianice, a strict mind, physicist, winner of the National Olympics in Physics and ecology. Owner, founder, president of Ecindustria Sp. z o.o. Chief designer of multidisciplinary design and construction company. Now owner and founder of the Fund. Courageous and determined in making the right decisions, I am is determined to achieve my goals.

I interested in modern technologies and renewable energy sources especially innovative solar technologie .

My interest in the financial and investment market is the driving force behind obtaining the investment advisor, stock broker license

Sincerely

Krzysztof Holwek

EXPERIENCE

HOLWEK ASI. [2022]

Owner, founder of Fund

ECINDUSTRIA. [2008]

Owner, founder, president of investment team Ecindustria Sp. z o.o. , chief designer of multi-sector investment projectors, chief coordinator. Designer of 200 construction permits in the field of renewable energy wind farms

EDUCATION

INVESTMENT ADVISOR [2022]

Course completed 2022

STOCKBROKER [2022]

Course completed 2022

SGH WARSAW SCHOOL OF ECONOMICS

Postgraduate studies, BIM - modern methods of working in multi-sector project teams.

CRACOV UNIVERSITY OF TECHNOLOGY

Faculty of Civil Engineering, Institute of Information Technology in Civil Engineering

Mechanical engineer in the field of mechanics of FEM structures

PHOTOVOLTAIC FARMS

I designed a total of 50 photovoltaic farms with a total capacity of 100 MW. Currently I'm designing photovoltaic farm 50 MW.

WIND FARMS

Currently, I'm designing solar farms up to 200 MW. I am in the process of approving locals for wind turbines and photovoltaics with the total capacity of 400 MW.

MOBILE NETWORKS

CENTERTEL

Polkomtel S.A.

I have done about 50 projects for mobile networks for companies like: Centertel, Polcomtel, Era.

ENERGY BLOCKS

I designed the Power station Kocienice 4 GW - energy project for cooperation with dr hab. Andrzej Sztandera. Power Station Kocienice - one of the most important on the Polish energy market.

[Link](#)

I designed the PKN Orlen Olefiny - project for cooperation with dr hab. Andrzej Sztandera. The Olefin production plant is one of the most important installations in the Polish petrochemical production chain.

[Link](#)

REAL ESTATE example projects:

Gerrn Horizon - office building in Łódź. (in cooperation for Skanska)

Port Łódź - the third largest shopping gallery in Poland. (incooperation for Budimex)

Arboretum Łódź - 315 apartments of various sizes, plus 319 parking spaces. Functionally finished common areas and a green courtyard in the middle of the investment with a playground for children complete this unique project. (in cooperation for)

EC1 in Łódź - documentation in the field of expertise and inventory of all facilities on the site of the former heat and power plant. The documentation was used by Libeskind company to design a new vision of the Lodz city.

MULIT-SECTOR PROJECTS example projects:

Opole University of Technology - modernization and thermal modernization project of the University of Technology in Opole.

Fort Jakuba in Toruń - revitalization of the historic center in Toruń.

Primary School in Toruń - building permit design and detailed design for primary school in Toruń.

Lodz medical university sports center - - building permit design and detailed design for Medical University in Lodz.

INNOVATION IN RENEWABLE ENERGY

I develop off grid projects. (hydrolyser, biomethane, photovoltaics and wind farms.)

Off grid - innovative projects of renewable energy sources - this is my new direction in design. After several years of experience in designing, having extensive knowledge in the field of conventional energy and convention of renewable energy sources, I meet the expectations of the market and created a new product. We are moving towards energy block projects. Our environmentally friendly projects are my goal and a real need of today's market. In my new innovative product, the disadvantage of instability in the operation of renewable energy sources has been eliminated by combining knowledge with conventional designs. I create **energy island solutions that can be independent and not connected to the grid - operating continuously** and used for fuel production - which we can transport by road.

LIST OF COMPLETED PROJECTS

1.
Construction of Senvion 3.4M140 wind farms with a capacity of up to 3.4 MW with an emergency technical area and internal access roads, Głuchołazy commune - 15 turbines
2.
Construction of GE2.5-120 wind farms with a capacity of up to 2.5MW, along with access roads, maneuvering yards in Horodyszcze, Wisznice commune - 12 turbines
3.
Construction of Vestas V100-2MW wind farms with a capacity of up to 2000kW, along with access roads, maneuvering yards, Warta commune - 14 turbines
4.
Construction of Vestas V100-2MW wind farms with a capacity of up to 2000kW, along with access roads, maneuvering yards, municipality of Zadim - 4 turbines
5.
Construction of Senvion 3.0M122 wind farms with a capacity of up to 3000kW, along with a hardened surface, Żary commune - 11 turbines
6.
Detailed design of the VESTAS V80 wind farm in the field of construction, Błaszki commune - 2 turbines
7.
Construction of one GE V70.5-1.5MW wind farm with a capacity of up to 1500kW, along with the existing access road and the existing maneuvering yard, located in Barzowice
8.
Construction of one wind farm with a target capacity of up to 2.0 MW, along with an access road and a maneuvering yard ". Address of the investment plot no. 636, 637, 659 in Dęba district, commune Manually
9.
Construction of one wind farm with a target capacity of up to 2.0 MW with an access road and a maneuvering area on plots of land, reg. No. 163/2, 164/2 in Borowa, commune Wola Krysztoporska
10.
Reconstruction of the SUDWIND S46 / 74m wind farm with a capacity of 750kW located in Brzeźno
11.
Construction of a wind farm with a total capacity of up to 0.8 MW in Złotniki Małe, Żelazków commune - 2 turbines
12.
Construction of a wind farm type - GE V77-1.5MW, Darłowo commune
13.
Construction of a wind power plant with a capacity of up to 1500kW, with a cable and measurement connection, access road, maneuvering yard in Kazimierz, Lutomiersk commune

LIST OF COMPLETED PROJECTS

14.

Construction of a power plant with a total capacity of 0.8 MW to 1.2 MW (including an access road, maneuvering yard and accompanying infrastructure) in the town of Kuszyn

15.

Project for the construction of the TACKE WINDENERGIE TW 1.5s wind farm in the field of architecture and construction in the town of Knipy

16.

Construction of the TACKE WINDENERGIE TW 1.5s wind farm with a rated power of 1.5 MW with the necessary infrastructure and accompanying facilities in Szczepanki, Łasin commune

17.

Construction of one wind farm with a target capacity of up to 2.0 MW, along with an access road and a maneuvering yard on the plot no. 18, 19, 20, 21 in Paskrzyn, commune Manually

18.

Construction of one wind farm with a target capacity of up to 1.0 MW, including a maneuvering yard on the plot of land, registration no. 667, Słupia Kapitulna precinct, commune of Rawicz

19.

Construction of one ENERCON E66 wind farm with a rated power of 2.0 MW on plot no. 11/2, together with the necessary infrastructure and accompanying facilities, i.e. with an access road, maneuvering yard on plot 11/2 and a distribution station, underground cable line on plots of land no. 11/2, 117/2 located in Semlin and plots of land no. 196/2, 198 located in Kleszczewo Kościerskie

20.

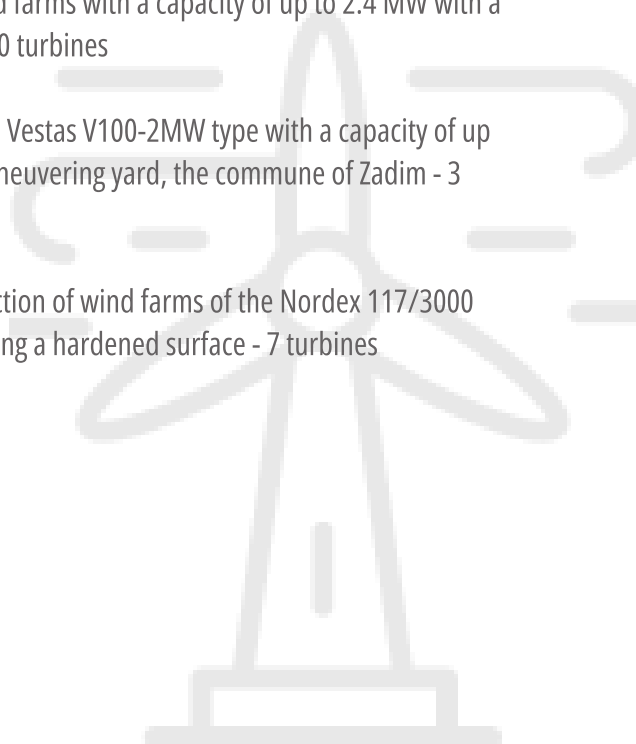

Construction of NORDEX N117 - 2.4 MW wind farms with a capacity of up to 2.4 MW with a paved surface in Jartypory, Liw commune - 10 turbines

21.

Construction of the Waycim wind farm of the Vestas V100-2MW type with a capacity of up to 2000 kW, along with an access road, a maneuvering yard, the commune of Zadim - 3 turbines

22.

Construction projects - replacement construction of wind farms of the Nordex 117/3000 type with a capacity of up to 3000kW, including a hardened surface - 7 turbines

OTHER PROJECTS

LIST OF COMPLETED PROJECTS

1.
Renovation and thermo-modernization project of the repair hall no. 1 and 2 together with the development of septic tanks and technical infrastructure, construction of an overhead crane and modernization of the existing technological line in Zduńska Wola Karsznice - public procurement
2.
"Design of a perlite silo with working platforms, ul. Gipsowa 3, 97-427 Rogowiec "- private investor
3.
Project of thermal modernization and application of renewable energy sources, reconstruction and extension of the didactic building for the Faculty of Production Engineering and Logistics at the Opole University of Technology at ul. Sosnkowskiego 31 in Opole - public procurement
4.
High-bay storage building with an expeditionary part of the LEGS company in Aleksandrów Łódzki - private investor, construction manager
5.
Construction of production and warehouse buildings for changing and storing cotton yarn, a social and office building and a car park along with the reconstruction of the existing technical infrastructure - private investor, construction manager
6.
Reconstruction of the chimney and the boiler house building, involving the demolition of the existing chimney, construction of a new one and extension of the boiler house at the site of the dismantled chimney - Object No. XXIX, on plot no. 573/10 in the town of Konopnica, commune Rawa Mazowiecka - private investor
7.
Construction of a car wash with technical infrastructure and a sealed sewage tank, Konopnica, plot, plot 579/22, 579/23, 573/19, 574/4 - private investor
8.
Superstructure of a building for diagnostic service of vehicles, Konopnica, plot no. 573/19 - private investor
9.
Technical opinion on the possibility of installing devices, including antenna supporting structures and radiocommunication installations on the existing mast Sopot, 81-874 Reja 13/15 street - mobile telephony
10.
Technical opinion on the possibility of installing devices, including antenna supporting structures and radiocommunication installations on the existing mast Starogard Gdański 83-100, ul. Sadowa 154/5 - mobile telephony
11. Technical opinion of the mast structure in terms of modernization, ul. Szczecińska 25A, 75-122 Koszalin - mobile telephony

OTHER PROJECTS

LIST OF COMPLETED PROJECTS

12.
Technical opinion of the mobile telephony base station, (41-800) Zabrze, ul. Matejki 6 - mobile telephony
13.
Technical opinion of steel masts for the modernization of the mobile telephony base station, ul. Wolności 392, 41-800 Zabrze - mobile telephony
14.
Technical opinion of steel masts for the modernization of the mobile telephony base station, ul. Kubiny 26, 41-600 Świętochłowice - mobile telephony
15.
Technical opinion of steel masts for the modernization of the mobile telephony base station, ul. Kopernika 26, 43-200 Pszczyna - mobile telephony
16.
Technical opinion of the steel tower structure with regard to the modernization of the mobile telephony base station, ul. Sądowa 14, 89-100 Nakło nad Notecią - mobile telephony
17.
Construction of steel masts in terms of modernization, ul. Szosowa 5, 74-320 Barlinek - mobile telephony
18.
Technical opinion of the steel tower structure with regard to the modernization of the mobile telephony base station, ul. Zbożowa 1, 62-023 Gądko - mobile telephony
19.
Technical opinion of the mast structure in terms of modernization, ul. Brzozowskiego Stanisława 12, 71-261 Szczecin - mobile telephony
